Word of minister of health

Cancer is considered as a big challenge in all countries of the world developing and non-developing because the reports of all international organization have referred to that the mortality due to cancer is in continuous increase and it is predicted that it will be in the first rank of all deaths in the upcoming decades.

Ministry of health is very careful about this health problem and it has a comprehensive vision to deal with it and control it ,so the Iraqi cancer board with the cooperation of the concerned directorates in the ministry and directorates of Baghdad and governorates ,with our direct supervision is now embracing a group of preventive and statistical programs which aim to health education about how dangerous is cancer, the importance of following the healthy habits and the great importance of early detection ,registration of new cases ,data analysis, doing researches and specialist studies ,putting the necessary health protocols to control cancer and supplying the integrated therapeutic services in all cancer treatment centers in Baghdad and governorates.

Cancer registration program is the cornerstone of the national plan to control cancer and these information in the annual report is referring to the great efforts of our health institutions in the field of how to deal with the cancer diseases and give the chance for the researchers and students to get benefits of all the information's,

**Minister of health
Dr.Adeela Hmood Hussien
Head of Iraqi cancer board**

Preface

In the name of God

Cancer is considered as the most serious health problem in Iraq and it is now occupying more importance after the progress in spite of the hard circumstances.

Breast cancer is the first one in Iraqi society in the percentage of 23% from all cancer diseases and 28% from cancers in females ,half of them is under 50 years of age , these data caused more progress in implementation of early detection program and health education and to follow the modern instructions which improve management with low cost drugs ,and about lung cancer it is in the second rank with the rate of 6.24 with the highest mortality rates in Iraq and the law of smoking stoppage was legislated with the number of 61 in the year 2012.

The data in 2014 pointed to registration of 25598 new cases 11391 in males and 144207 in females, the rate is 80.22, the highest rate was in Karbala 94.60, then in Baghdad 90 ,then in Basra 71.5

This is the 21 the issue of cancer registry all the rates is calculated according to gender ,age group ,all governorates and districts ,histopathological changes and types of cancers.

We hope this report will be the good source for researchers and planning for better prevention, better early detection and better management

We want to express gratitude for all data producers .staff in cancer registry in all governorates, these data has a great benefit in fulfillment of cancer control program

God bless us for serving our patients and hard work to control this killing disease.

Dr.Raad H .I.Timimi

Director Manager

Dr. Hayder Hamza

General secretary

Iraqi cancer Registry Center Publications :

We have many published reports & results of Iraqi Cancer Registry every year since 1976 and we published these results:

1976 - 1985

1986 - 1988

1989 - 1991

1992- 1994

1995 - 1997

1998 - 1999

We also published results of Iraqi Cancer Registry in 2000 , 2001 , 2002 , 2003 , 2004, 2005 , 2006 , 2007 , 2008 , 2009 , 2010 , 2011, 2012,2013 & 2014 .

Iraqi Cancer Registry Team (2014)

- Dr.Haydar Hamza Al abedi	Secretary General Of Iraqi Cancer Board
-Dr.Raad Al-Timimi	Executive Manager of Iraqi cancer Board
-Dr. Anfal Dhia-Aldeen Mohsin	Manager of Cancer Registry Section
- Athraa Husain	Chief Statisticians
- Lamyaa Mutleg	Chief Statisticians
- Khitam Jasim	Chief Statisticians
- Menal Hesoon	Statistician Assistant
- Joolan Salih	Dental Manager
- Ahmed Fadhil	Statistician Assistant
- Saif Ali	Technician Observer Assi
- Khalid Hasan	Lab. Assistant
- Shakir Hmood	Medical Assistant
- Redhab Muhammad	Senior Programmer
- Malath Kamil	Accountant Director
-Nadeyeh Ali	Observer
-Samraa Nassir	Programmer
-Ali Hamid	Associate Researcher

Checking and Review

-Dr.Haydar Hamza Al abedi	Secretary General Of Iraqi Cancer Board
- Dr Ahmed Mubarak	Consultant Oncologist
- Dr. Raad Al-Timimi	Senior Specialist in Internal Medicine
- Dr. Anfal Dhia-Aldeen Mohsin	Community Medicine Specialist
-Dr. Neqham F. Hasan	Oral Medicine
- Lamyaa Mutleg	Chief Statisticians

Objectives of Iraqi Cancer Registry:

- To define the size of the cancer problem and pattern of cancer occurrence in Iraq.
- To provide data on cancer for epidemiological and clinical studies.
- To make data of cancer incidence and prevalence available for use by health planners and professionals in order to plan for cancer prevention, control and management in a cost effective manner.

Vision:

To meet the highest attainable international standards in cancer registration, surveillance and control.

Mission:

To register all cancer cases reported in various health institutions in Iraq and to avail the data and /or information gathered for policy development and support in cancer research, treatment, control ,prevention, and surveillance.

Data variables:

The number of assessment variables used by Iraqi cancer registry is based on the international standard variables for all cancer registries. There are various formats that may be used. Iraqi cancer registry uses standards provided by the International Agency for Research on Cancer (IARC).which include:

- 1- Patients details: first name, father's name, family name, mother's name sex, age/date of birth, nationality, address, address detail &occupation.
- 2- Tumor: diagnosis date, basis of diagnosis, primary site /topography (ICD-O) code, histology/morphology (ICD-O) code, behavior, grade and stage at diagnosis

- 3- Treatments: initial and subsequent treatments surgery, radiotherapy, chemotherapy, hormonal therapy &immunotherapy.
- 4- Sources of data: hospital and path. Lab. / facility code number abstracter and date.
- 5- Follow up: patient status (alive or dead), last contact with physician/ health care provider or if dead – date of death and cause of death.

Classification and Coding:

The primary site (topography) and histology (morphology) of the malignancies are identified and coded according to the International Classification of Diseases for Oncology third Edition (ICDO- 3), published by the World Health Organization (WHO), 2000.

Data Analysis:

The computer software program used for data entry and incidence tables output is CanReg 4 ,developed by the International Agency for Research on Cancer, (IARC) Lyon, France ,this software has a duplicate entry checking facility. Validity checks are performed for consistency between items:

Site/histology, gender/site and age/site/histology combinations by CanReg4.Epi-info and other statistical programs were used for further analysis by the Iraqi cancer registry staff.

Population:

The estimated population of Iraq in 2014 was (36004552) of the (18319008) were males and (17685544) were females.

Source: (Estimated Population of Iraq in 2014 by age group & gender from Ministry of Planning / Central statistical Organization).

About (5073358) of the population is under 5 years old, and (14188265) of the population is under 15 years old. Only (631913) of the total population is above the age of 65 years old.

Table (1) show age distribution and gender of Iraqi population, in 2014. Table (2) shows the population distribution of Iraqis by provinces which is used to calculate incidence rates for cancer by provinces.

Situation analysis:

1. Registration of 25598 new cases in 2014 and it was 23308 in 2013
2. Registration of non-Hodgkin lymphoma and skin cancer in top ten
3. Registration of non-Hodgkin lymphoma in top ten for males
4. Registration of urinary bladder cancer in males top ten cancers with 1019 cases
5. 561 cases of thyroid cancers were registered and it is in top ten in female
6. Incidence rate in Baghdad from 52.48 in 2013 to 90 per 100.000 in 2014
7. New cases of cancer in Nieneveh in 2014 is 1953
8. In Al-Anbar new cases is 388
9. In Dyala the rate of breast cancer in 2014 13.59
10. In karbala the rate of cancer is the highest in Iraq in 2014 .
11. In Basrah pancreatic tumor is not reported in 2014.
12. In duhok the number of new cases is 758.
13. The highest number of leukemia is in basrah 160.
14. Mortality rate of cancer in Iraq in 2014 is 22.81.

Foreword:

It is my pleasure to present to you the 21th annual report of the Iraqi Cancer Registry 2014, depicting the trends and characteristics of cancer in Iraq and clarifying many misconceptions, while providing informative and reliable data to help shape policy at the national level.

Cancer has become a major public health issue in Iraq and its burden continues to grow while our population is growing still without having embraced healthy lifestyles that may help prevent many non-communicable diseases such as cancer.

The data presented in this report provide our colleagues with information on the epidemiology of cancer in Iraq and its distribution by site, gender, age groups in all governorates. It also serves to assist researchers, cancer experts, and policymakers in identifying priorities for developing cancer control plans, national strategies and programs for cancer screening early detection and prevention programs, and will also prove useful when planning for diagnostic and treatment services.

I appreciate the efforts of all who involved in ensuring high quality data Collection, analysis and interpretation of data, and ensure its quality through the implementation of quality control procedures.

Acknowledgment:

The Iraqi Cancer Registry operates within the Ministry of Health, however it relies on the cooperation of a large number of hospitals in all health directorates and clinicians to provide it with the vital information required to succeed.

We would like to thank clinicians, hospitals and pathology laboratories for their continued support.

The valued support of the focal points in all hospitals and laboratories is also appreciated.

The Interactions between the registry and its stakeholders are very positive and greatly appreciated.

The dedicated hard work during the process of data collection and data entry of the staff in the cancer control unites in each health directorates.

We would like to thank our focal points personals in all hospitals and laboratories for the timely collection and submission of cancer patient's data to the Iraqi Cancer Registry.

Geography:

The Republic of Iraq is located in the south-west of Asia, to the north-East of the Arab homeland, bounded on the North by Turkey, on the East by Iran, on the South by Arab Gulf, Kuwait& Saudi Arabia, and on the West by Syria, Jordan &Saudi Arabia. The highest the proportion of the length of Iraq's borders with neighboring countries is with Iran about (37.6%) followed by Saudi Arabia about (23.5%).

Iraq has occupied an area of 435,052 square kilometers, the province of AL-Anbar the highest area, reaching to 31.7%, followed by AL Muthana province by 11.9% of the area of Iraq and Nineveh province reaching 8.6% of the area of Iraq.

(The source Environmental statistics in Iraq Report 2009)

The surface section of Iraq consist of deserts which is about 38,7% ,then the plains including (marshes and lakes) include about 30,5% of the area, mountains which is occupied about 21,1% of the area and terrain lands which occupies about 9,7% of the surface area of Iraq.

Source: General Directorate of Survey

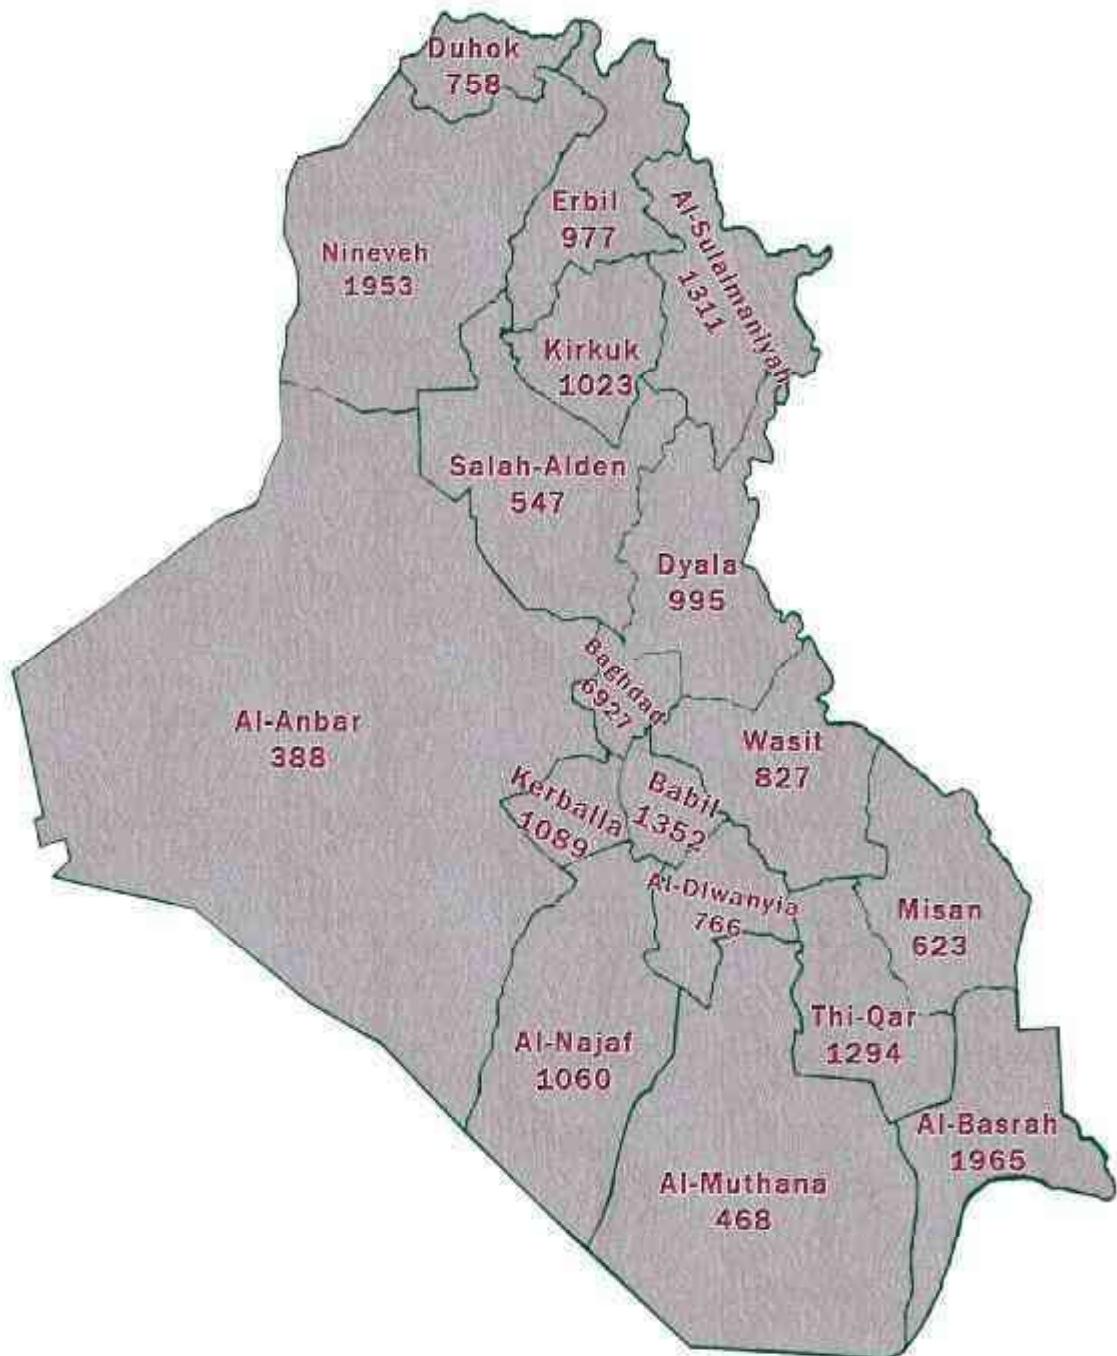

Note:

**** How to Calculate Incidence Rate:**

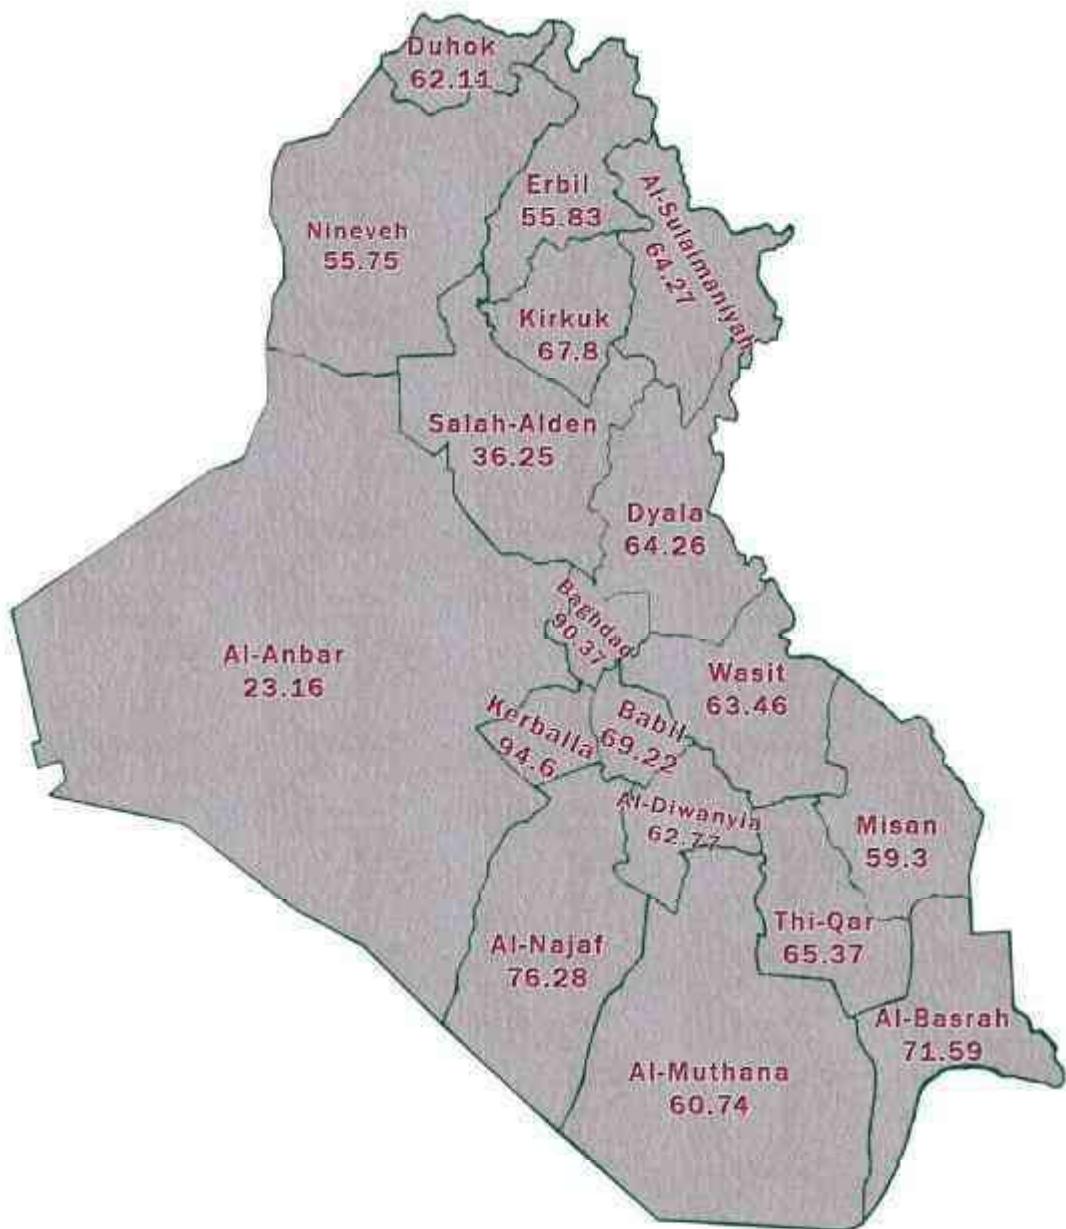

$$(1) \text{Incidence Rate} = \frac{\text{No. of new cancer cases}}{\text{Population at risk}} \times 100000$$

$$(2) \text{Age specific incidence rate} = \frac{\text{No.of new cancer of males in}(age group)\text{years of age}}{\text{No.of population of males in}(age group)\text{years of age}} \times 100000$$

*Cancer Mortality in
2014*

Cancer Mortality in 2014:

Cancer is the fourth cause of death in Eastern Mediterranean Region and is the third cause of death in Iraq and its rate is increasing rapidly. The observed increase can be attributed to the trend of population aging, better detection and registration, and most importantly increased exposure to risk factors. The most important of these risk factors is smoking. Other factors include unhealthy diet, reduced physical activity, other behavioral lifestyle changes, pollution, and increased exposure to industrial and agricultural carcinogens.

The colorectal cancer death is the ninth cause of deaths in Iraq with 5.71 %.

A total cancer deaths in Iraq is (8211), about (4252) in males& (3959) in females.

The first cancer deaths is cancer of Bronchus and Lung ,the second is breast cancer, the third is brain cancer, then Leukemia, Liver ,colorectal, , lymphoma , bladder , as shown in table (67). In the data of 2013 the first cause of death is from cancer of bronchus and lung with rate of 3.89 and it is the same in 2014 3.72 the second cause of data is breast cancer with the rate of 2.31.

Total cancer deaths in Iraq is 8211 in females is 3959 and in males 4252

The lowest rate of all types of cancers is from the cancer of pancreas which is 1.08.

In males the first ten cancer deaths are cancer of Bronchus & Lung, Brain cancer, leukemia, liver, colorectal, lymphoma , Urinary Bladder, stomach, pancreas, As shown in table (68).

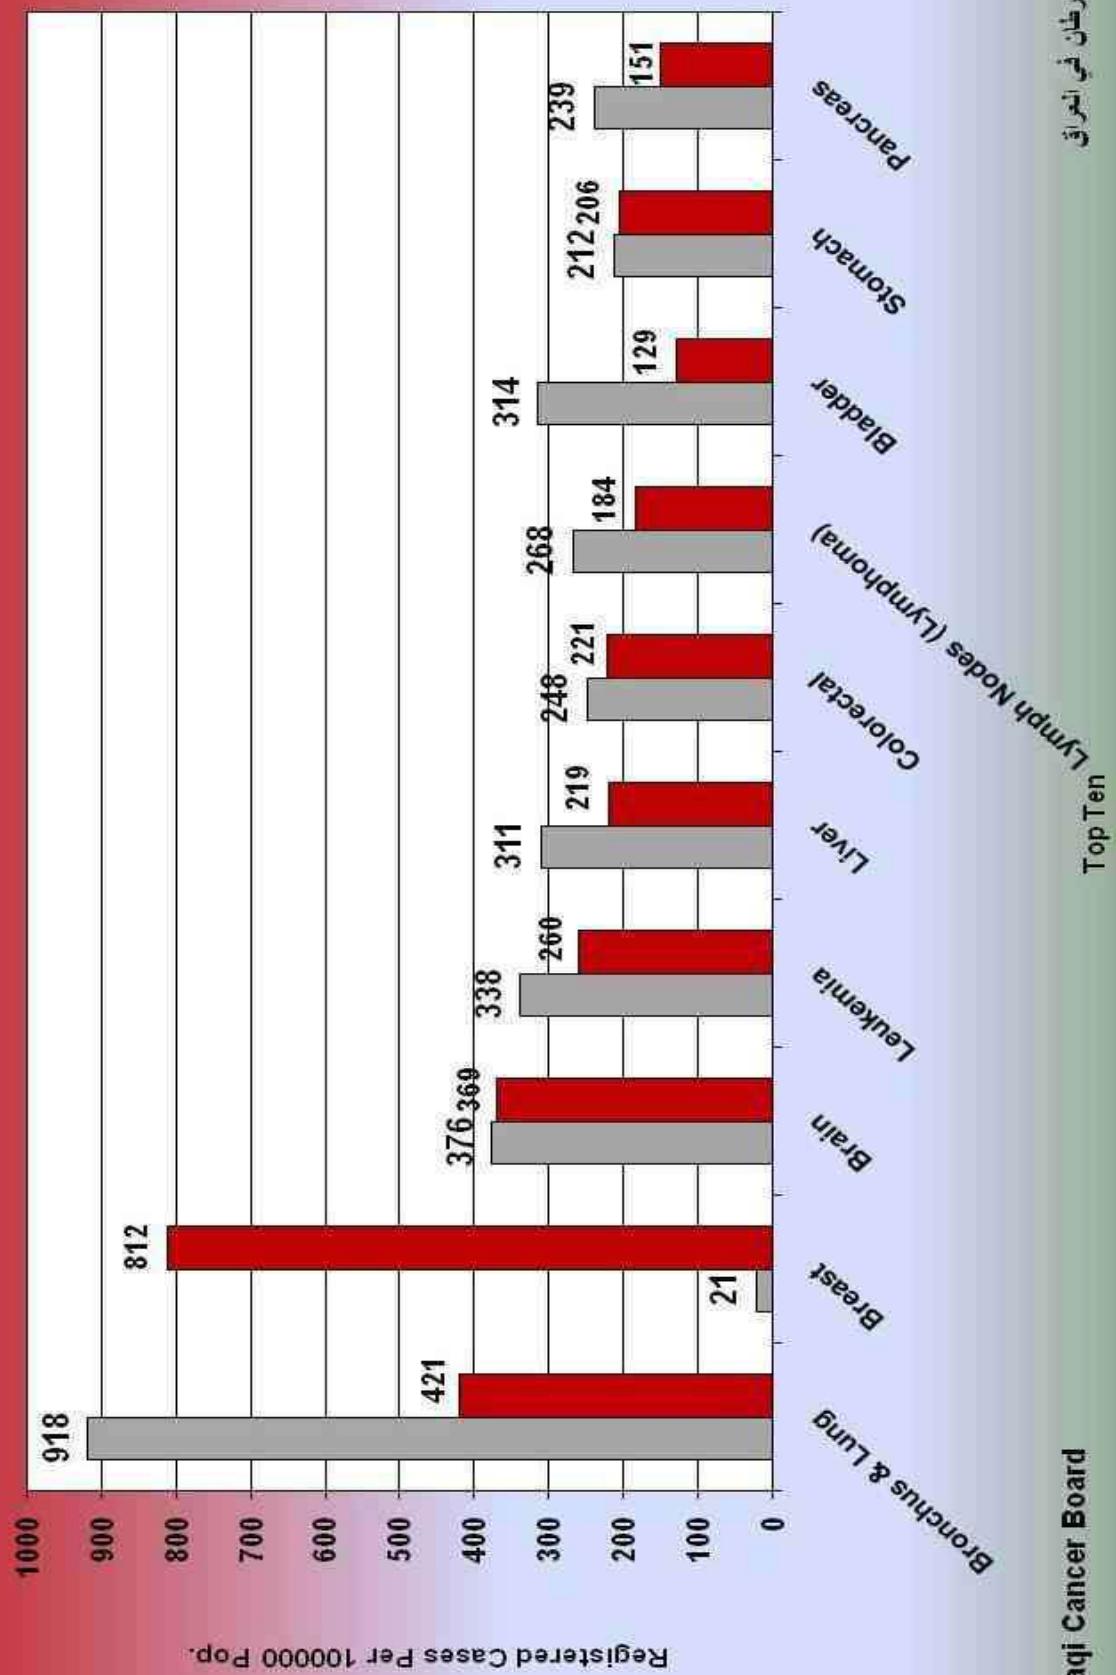

In female the first ten cancer deaths are Breast cancer, Brain, Bronchus &Lung, leukemia, then Liver, Stomach, Colorectal, lymphoma, Pancreas, As shown in table(69).

المقدمة

بسمه تعالى

مرض السرطان هو احد الاسباب الرئيسية المؤدية للمراءة والوفاة في العراق حيث انه السبب الثاني للوفاة بعد (9.6 %) بعد امراض الاوعية الدموية والقلب .

هذا التقرير يمثل بيانات عام 2011 لوزارة الصحة العراقية ويكشف عن نسبة الاصابة بالامراض السرطانية .

الغرض الرئيسي من هذا التقرير هو لتزويد المتخصصين والباحثين وصانعي القرار واخرين ممن لهم اهتمام بالمجال الصحي بمعلومات كاملة حول اكثر الامراض السرطانية شيوعا في العراق واماكن وجودها بحسب العمر والجنس في المحافظات ليكون عونا في تخطيط وتقدير خطط واستراتيجيات السيطرة على السرطان .

ولتأكيد الدقة في المعلومات التحليلية المقدمة في هذا التقرير تم جمع البيانات من جميع محافظات العراق وتم ادخالها وتحليلها ببرنامج التسجيل السرطاني العالمي المعتمد من قبل منظمة الصحة العالمية

CANREG4

كلمة السيدة وزيرة الصحة

يشكل مرض السرطان تحدي مهم لانظمة الصحية في مختلف الدول سواء المتقدمة منها او النامية ، حيث اشارت تقارير المنظمات الدولية المتخصصة ان الوفيات الناتجة عن مرض السرطان في تزايد مستمر ومن المتوقع ان يشكل المرتبة الاولى لاسباب الوفيات في العقود القادمة .

وحرصا من وزارتنا وضمن رؤية شاملة للتعامل مع مرض السرطان والسيطرة عليه فأن مجلس السرطان في العراق بالتعاون مع الدوائر المعنية في مركز الوزارة ودوائر الصحة في بغداد والمحافظات وبمتابعة مباشرة من قبلنا يتبنى مجموعة من البرامج الوقائية والاحصائية التي تهدف الى التوعية والتثقيف بخطورة المرض واهمية تتبع العادات الصحية السليمة وضرورة الكشف المبكر عنه وتسجيل الاصابات السرطانية على المستوى الوطني وتحليل البيانات واجراء البحوث والدراسات التخصصية ووضع السياسات الصحية اللازمة للسيطرة على المرض وتقدير الخدمات العلاجية المتكاملة للمرضى الاعزاء في مستشفيات ومراكيز علاج الاورام في بغداد والمحافظات كافة .

يمثل برنامج التسجيل في العراق ركن اساس من اركان الخطة الوطنية للسيطرة على مرض السرطان وتعكس البيانات العلمية الواردة في الاحصائية السنوية للتسجيل السرطاني في العراق جهود مؤسساتنا الصحية في مجال التعامل مع الامراض السرطانية تتيح للباحثين والطلبة الاستفادة مما ورد فيه وتقديم الدراسات والبحوث التخصصية العلمية لارتفاع بواقع الخدمات الصحية لمرضانا الاعزاء .

نبارك صدور التقرير الاحصائي لعام 2014 ونتطلع الى استدامة تلك الجهود الخيرة من قبل ابناءنا في مؤسساتنا الصحية كافة خدمة لعراقتنا الحبيب .

ومن الله التوفيق .

**د عديلة حمود حسين
وزيرة الصحة والبيئة
رئيس مجلس السرطان في العراق**
